L-3 Security & Detection Systems Receives Order for Its Next-Generation CX-Mobile™ G3 Cargo Inspection System

WOBURN, Mass., October 27, 2011 – L-3 Security & Detection Systems (SDS) announced today that it has received an order for its CX-Mobile™ G3 next-generation cargo inspection system from a customer in the Middle East. The high-energy CX-Mobile G3 produces the high-quality images required for accelerated and accurate cargo screening in a flexible platform suitable for a broad range of security and customs applications.

“We are pleased to announce the sale of our new third-generation mobile X-ray system,” said Thomas M. Ripp, president of L-3 Security & Detection Systems. “The G3 delivers unprecedented life-cycle cost benefits in a lightweight, road-ready platform that a single person can operate.”

The CX-Mobile G3 sets a new standard for high-energy, mobile X-ray design. The interior layout can be customized to suit varied concepts of operation and provides for the co-location of driver, operator and image analyst to enhance communication. Manufactured with corrosion-resistant materials, the CX-Mobile G3 is the lightest high-energy mobile screening solution available and features a boom that can scan even the largest road legal vehicles. With the ‘engine off’ feature during scanning, the CX-Mobile G3 consumes less fuel and delivers significant life-cycle cost savings compared to existing systems.

Like all L-3 SDS cargo platforms, the CX-Mobile G3 is powered by L-3’s best-in-class ClearView™ Imaging System and the new ClearView Workstation, which seamlessly integrates data from multiple X-ray systems and a host of other sensors, such as radiation detectors.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and intellectual property. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3 Communications

Headquartered in New York City, L-3 Communications employs approximately 61,000 people worldwide and is a prime contractor in C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and government services. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2010 sales of \$15.7 billion.
